

Indoor Air Quality Monitor

Protect your workplace from airborne particles to keep people safe.

RA12S-IAQ-RAS

We've got air quality covered.

Protect the people in your facilities from harmful airborne particulate matter with the Indoor Air Quality Monitor. This special bundle offers a Room Alert 12SR monitor along with multiple sensors to help monitor the particulate levels (both PM10 and PM2.5) and air quality in your facility. Get immediate alerts if conditions reach a level that could be harmful for your staff. For more information and specifications, please visit RoomAlert.com.

RoomAlert
We've got this.

Room Alert Indoor Air Quality Monitor

Monitor temperature, humidity, air flow, and airborne particulate levels to maintain optimal indoor air quality in your critical environments.

This focused bundle helps prevent poor air quality conditions, detect HVAC system failures, identify inadequate ventilation, and alert you to particulate contamination before it affects equipment performance or occupant health. The rack-mountable Room Alert 12SR monitor and three specialized sensors provide 24/7 air quality protection with instant alerts and centralized monitoring through Room Alert Account, all at a discounted bundle price.

Product	Name	Description
	Room Alert PRO 12SR Monitor	Monitor multiple environment conditions with the Room Alert PRO 12SR monitor. 1U rackmountable with built-in temperature monitoring, 8 total sensor ports, and a relay output port.
	Digital Temp & Humidity Sensor	Monitor temperature, humidity, heat index, and dew point from one sensor.
	Particulate Sensor	Monitor airborne particulate matter (both PM 10 and PM 2.5) as well as temperature.
	Air Flow Sensor	Get instant air flow readings at any vent or duct, as well as temperature. Perfect for HVAC monitoring.
